THE MINISTER OF STATE IN THE MINISTRY OF CHEMICAL AND FERTILIZERS, MINISTER OF STATE IN THE MINISTRY OF PARLIAMENTARY AFFAIRS AND MINISTER OF STATE IN THE DEPARTMENTS OF ELECTRONICS AND OCEAN DEVELOPMENT (SHRI EDUARDO FALEIRO): (a) Yes, Sir, INSAT Transponder capacity is being made available to private operators who have been licensed for providing value added services using VSATs. INSAT Transponder capacity is not being leased to private parties for transmission of T.V. signals.

**Ordnance factory, Itarsi**

594. DR. BAPU KALDATE: Will the PRIME MINISTER be pleased to state:

(a) when the ordnance factory in Itarsi was set up;

(b) the capacity utilisation of the factory in 1988-89 and 1992-93;

(c) the reasons behind under-utilising the capacity; and

(d) the reasons behind faulty planning for the Itarsi factory and low levels of production?

THE MINISTER OF STATE IN THE MINISTRY OF DEFENCE (SHRI MALLIKARJUN): (a) to (d) Ordnance Factory, Itarsi was set up in March 1983 with a capacity to the level of "War and wastage" requirements of certain chemicals/propellants, with the realisation that its actual production in peace time would remain substantially lower than the installed capacity. This is the approach normally adopted to have self-sufficiency in the production of propellants. In 1988-89, the capacity utilisation of the factory was 42.31 percent to cater mostly to the training requirement. By 1992-93, with phasing out of some categories of ammunition, the capacity utilisation came down to 15.11 percent. Now, some propellants to meet the emerging requirements have been developed and the capacity utilisation of the factory has risen to 39.05 percent in 1994-95. This is expected to increase further as steps have also been taken to make chemicals for the civil market in the separable capacity.
